ABOUT

More About Me

I have 2+ years of comprehensive experience in web development. I carry on creating awesome projects & dealing with clients and companies.

Howdy!

Skills: JavaScript, Node.js, Vue/React/React Native (with Material UI, Storybook, Enzyme, Redux), AngularJS, JQuery, C/C++, Linux, Objective-C, C#, MongoDB, MySQL, algorithms, neural networks (Python-based, C-based), Unreal Engine, Unity.

DevOps: Docker, Jenkins, AWS, Heroku, deployment configs.
By the way, I have several boilerplates.

Education: Bachelor's degree in software engineering (Taras Shevchenko National University of Kiev)

Languages: English, Russian, Ukrainian

Please contact me for the further implementation of your project, if I have several contracts in progress it does not mean that I am not available.

My general aims for each project:

- Get the desirable success
- Adhere to deadlines
- Keep you informed as much as possible
- Work efficiently
- Be a satisfactory employee

I am highly motivated to learn new things and work as much as I can. I look forward to your project!

I've Got Nice skills.

What People Say.

"I was very impressed with Alice work. He adhered to deadlines with good communiacion and updates throughout. I introduced him to a drag and drop app dev platform which he studied and understood quickly so as to connect a third party payment gateway to it.

I would definitely hire him again"

NOEL UCHE

CEO, Outlet 29

May 20, 2018

"Jumping from failure to failure with undiminished enthusiasm is the big secret to success." —Savas Dimopoulos

Jul 21, 2018

I Will Write A Technical Article For You, Medium Or Your Blog. I will complete the work quickly and with a great result. I have experience writing technical articles. I would write an article which will teach others how to complete some complex things according to your project or just lots of documentation with my own code.

May 19, 2018

Want to have refactoring option more accessible, such as in JetBrains. Thanks, VS
